Hampton Towne Estates

Hampton, NH - 03842

Water Main Shut Down

On Thursday, December 3rd, 2026, the water to all units will be shut off for several hours while some valves on our water main are replaced. Water will be shut down for several hours starting sometime between 8 and 10 AM.

Our vendors will work as quickly as possible, but the process will take several hours.

Please Note: The shut down and reactivation of the water main will likely introduce some air into your pipes. You may experience some temporary sputtering from your faucets after the water is turned back on.
